

Appendix 8B-1d: Time Series and Box Plots of Total Phosphorous at Non-ECP Monitoring Sites for Water Year 2001 and Earlier Periods

Key to Abbreviations

WY1: Water Year 1 from May 1, 1997- April 30, 1998

WY2: Water Year 2 from May 1, 1998- April 30, 1999

WY3: Water Year 3 from May 1, 1999- April 30, 2000

WY4: Water Year 4 from May 1, 2000- April 30, 2001

Appendices Note

The graphs in this section depict Total Phosphorus concentration data collected through Water Year 4 for Non-ECP water quality monitoring sites. The graph sequencing follows the station order shown in Table 1, Appendix 8B-1a. The Non-ECP structure locations are depicted in Figure 1, Appendix 8B-1. Additionally, the graphs are identified by the monitoring site name. In most cases, the monitoring site name corresponds to the structure. If the monitoring site is a surrogate location for a structure, the structure name(s) is shown in parenthesis below the monitoring site name.

Most graphs depict TP data collected by GRAB sampling methods. The graphs for sites with autosampler data are annotated with "Auto" (i.e., VOW1Auto). The TP data collected by both methods are not shown as combined data in the graphs.
